

RE: TSD Announcement of Global Payments Credit Card Gateway End-of-Life (EOL)

Dear Valued Customer,

This will serve as formal notice that TSD's Global Payments credit card processing gateway will reach end-of-life on February 1, 2021 (the Global Gateway EOL Date).

As of the Global Gateway EOL Date, you will no longer be able to utilize this gateway to process transactions or obtain any data. In addition, all services related to the Global Payments gateway (including support services) will cease on the Global Gateway EOL Date.

In recent years TSD has developed and deployed multiple credit card processing gateways supporting EMV chip card reader and processing technology that offer enhanced security for the merchant and consumer. EMV is a security standard for storing account information encrypted on credit cards. It's a more secure alternative to the magnetic stripe (mag stripe) that has traditionally been used to store information on the backs of cards.

To facilitate the migration of customers from the Global Payments credit card processing gateway TSD will be offering a one-time program to reduce cost and assist with the upgrade to EMV technology. To learn more contact your TSD sales representative today at (978) 794 1400.

We wish you continued success and thank you for your business.

Best Regards,

TSD
